MATERIALS

POLE

STAINLESS STEEL

Brushed hairline finished Stainless Steel, type AISI304 18/08 with 18% chromium and 8% nickel.

Wall thickness of the Stainless Steel tubes: 2mm.

OPTIONAL: we recommend the electropolishing treatment of the frame if it is to be used in a corrosive environment.

STAINLESS STEEL - BRUSHED
(optional electropolished)

RIBS

COATED ALUMINUM

Aluminium is a non-ferrous metal, which combines great mechanical rigidity with light weight; this makes it especially suitable for making furniture. If treated correctly it has a good resistance to corrosion. One of the treatments is powder coating. After a chemical pre-treatment an epoxy powder is applied statically and baked.

COVER

TEXTILE OR BATYLINE

TEXTILE

Royal Botania fabrics have been woven from mass-coloured acrylic fibre; your guarantee of optimal water- and UV resistance, plus years of comfort.

BATYLINE®

A woven polyester fibre protected by a PVC coating. This coating guarantees exceptional resistance to climatic conditions and UV exposure. The fact that there is no moisture absorption results in quick-drying action, little sensitivity to staining, and simplicity in cleaning.

BASE

GRANITE

Granite is (after diamond) the hardest stone in the world. Granite combines high scratch resistance with minimal porosity.

GRANITE - PEARL GREY

CHARACTERISTICS

Optional mobile base
