### MATERIALS

#### FRAME

##### COATED ALUMINUM + TEAK

Aluminium is a non-ferrous metal, which combines great mechanical rigidity with light weight; this makes it especially suitable for making furniture. If treated correctly it has a good resistance to corrosion. One of the treatments is powder coating. After a chemical pre-treatment an epoxy powder is applied statically and baked.

COATED ALUMINUM - WHITE

COATED ALUMINUM - SAND

COATED ALUMINUM - BLACK

#### TEAK

We only use carefully selected, fully grown teak, which is harvested in accordance with the strictest environmental standards. The reason for its generally commended durability is the high levels of natural oils it contains. The resulting minimal moisture absorption prevents warping which gives it great stability. Moreover, the wood is extremely resistant to the influences of chemicals, as well as against attacks by vermin.

TEAK

#### SEAT

##### OLEFIN FIBRE

Olefin fibre is a synthetic fibre made from polyethylene. The advantage of this fibre is its strength, colour fastness and comfort. Also it is very resistant to staining and different weather conditions.

OLEFIN FIBRE

### CHARACTERISTICS

Optional cushions
