MATERIALS

FRAME

TEAK

We only use carefully selected, fully grown teak, which is harvested in accordance with the strictest environmental standards. The reason for its generally commended durability is the high levels of natural oils it contains. The resulting minimal moisture absorption prevents warping which gives it great stability. Moreover, the wood is extremely resistant to the influences of chemicals, as well as against attacks by vermin.

TEAK

COATED ALUMINUM

Aluminium is a non-ferrous metal, which combines great mechanical rigidity with light weight; this makes it especially suitable for making furniture. If treated correctly it has a good resistance to corrosion. One of the treatments is powder coating. After a chemical pre-treatment an epoxy powder is applied statically and baked.

COATED ALUMINUM - WHITE

COATED ALUMINUM - SAND

COATED ALUMINUM - BLACK

TOP

SOLID SURFACE

Mass-dyed composite material, they combine mass with homogeneity, yet without seams or joints.

The basic ingredient of this product is aluminium trihydrate.

WHITE

CERAMIC

Made of inorganic materials that crystallise at very high temperatures and are thus very hard and resistant to wear.

WHITE

TRAVERTINE

BLACK

BIANCO STATUARIO
