TEAK

We only use carefully selected, fully grown teak, which is harvested in accordance with the strictest environmental standards. The reason for its generally commended durability is the high levels of natural oils it contains. The resulting minimal moisture absorption prevents warping which gives it great stability. Moreover, the wood is extremely resistant to the influences of chemicals, as well as against attacks by vermin.

WOVEN OLEFIN FIBER

Olefin fibre is a synthetic fibre made from polyethylene. The advantage of this fibre is its strength, colour fastness and comfort. Also it is very resistant to staining and different weather conditions.
